

Presentation – How Much Do You Really Need To Retire?

Many people have no idea how much they need to retire. This amount can be measured as both a net worth (of investment assets) and as an income. People also aren't sure whether or not to include the amount shown on their Social Security statements. My latest presentation on QuantiaMD discusses this important concept. It also discusses the fact that most docs won't need anything near their pre-retirement gross income in order to maintain the same standard of living in retirement as they had in their peak earnings years.

My [most recent presentation on QuantiaMD](#) was # 6 in the series. This is really a fun format if you haven't seen any of the others. They are 8-15 minutes long, contains slides, polls (usually with much different results than the ones I do of regular site readers), and audio. If you haven't seen the first five, you can find them here:
